

# MODEL PORTFOLIO 07

## Stable.

A stable investment strategy reflects your desire to seek lower, more stable returns while avoiding high risk. It may also mean that you're planning to invest over a short period of time.

## Individual Funds

### Fixed Income

15% / DFIHX - DFA Dimensional 1 Yr Fxd Inc  
25% / DFIGX - DFA Intm Govt Fixed Income  
10% / DFGBX - DFA 5 Yr Gbl Fixed Incm Port  
10% / DFGFX - DFA 2 Yr Gbl Fixed Incm Port

3% / DFLVX - DFA US L/C Value Portfolio

### US Small Cap

6% / DFSVX - DFA Small Value  
3% / DSCGX - DFA US Small Growth  
3% / DFSCX - DFA Micro Cap

### REIT

7% / DFREX - DFA Real Estate

### International

4% / DISVX - DFA Intl Small Cap Value  
2% / DISMX - DFA Intl Small Cap Growth

### Emerging Markets

4% / DFEVX - DFA Emerging Markets Value  
5% / DEMSX - DFA Emerging Markets Small Cap

## Performance Summary as of March 2013

Last 3 Months Return	Last 1 Year Annualized Return	Last 3 Years Annualized Return	Last 5 Years Annualized Return	Since 5/1998 Annualized Return	Since 5/1998 Standard Deviation
3.32%	6.65%	6.52%	5.43%	7.02%	7.36%

The AssetBuilder (AB) constructed portfolios – Model Portfolios – have been developed based on historical performance of the standard asset classes (stocks, bonds and cash) and of representative market index fund measures. Since this is a Model Portfolio (hypothetical), there can be no assurance that an AB client would have achieved similar rates of return over the time frame. In addition, since the time period in question is a historical one, there can be no assurance that future results achieved by AB clients will in any way resemble those represented by the Model Portfolios.

The Performance Table above is representative of a compilation of the selected funds to achieve a probabilistic return for a measured level of risk. Model Portfolios are rebalanced every year on May 1. All performance data is total returns which includes interest and dividends. The DFA growth funds (DUSLX, DSCGX, DISMX) measure uses actual returns starting in January 2013. To gain additional history, appropriate DFA indexes were appended back in time from January 2013. Each historical index used was net of fees; DUSLX—24 basis points (0.24%), DSCGX—43 basis points (0.43%), DISMX—63 basis points (0.63%).

Although we have done our best to present this information fairly, hypothetical performance is still potentially misleading. Hypothetical data does not represent actual performance and should not be interpreted as an indication of actual performance. This data is based on transactions that were not made. Instead, the trades were simulated, based on knowledge that was available only after the fact and thus with the benefit of hindsight. Results do not include the impact of taxes, if any. Past Returns are not indicative of future results.
